WWW.MECHANICALHVACSERVICES.COM

CONTROLS:

Our people have years of experience in dealing with a variety of control applications. From DDC to pneumatic systems, we have aided our customers to reduce operating costs from expert installations to preventative maintenance.

HVAC & REFRIGERATION:

The core of our business is Heating, Ventilation and Air Conditioning. We back up our reputation with years of experience. From installation to preventative maintenance, Mechanical HVAC Services is a wise choice.

BOILERS:

A well maintained boiler will give years of solid service. Should trouble come and you need our assistance, we can trouble shoot and repair any problem.

COMPUTER ROOM ENVIRONMENTAL SOLUTIONS:

The environmental system is the health of your computer room. Our customers use our services to ensure their needs are being taken care of. We are available twenty-four hours a day, seven days a week to ensure our customers that their computer systems are “on-line” with no interruptions.

PROCESS CHILLERS:

Mechanical HVAC Services has the knowledge and experience to work on critical systems such as process chillers. Process chillers have varied uses, including: MRI magnets, cancer research and radiology equipment, manufacturing processes, etc. We have several locations that rely on us to give their company the peace of mind their equipment will run.

VIBRATION ANALYSIS:

An area of concern today is excess vibration on mechanical equipment. With proper analysis, mechanical equipment can have years of extended life, with greater payback and minimal “down time”.

INDUSTRIAL PIPING:

Mechanical HVAC Services is fully capable of industrial piping including refrigeration and steam. For new construction and repair, call Mechanical HVAC Services.

DEHUMIDIFICATION SYSTEMS:

We have the experience to design, install and maintain your dehumidification units. Our technicians have experience working on Dectron, Dessert Air and PoolPak systems to name a few.

RESIDENTIAL HEATING/COOLING:

Mechanical HVAC Services has a dedicated residential staff to provide homeowners the best when it comes to service and repair.

BACK FLOW CERTIFICATION

- ✓ Mechanical HVAC Services can offer you “Backflow Testing and Certification” by serviced technicians that are registered with the State of North Carolina.
- ✓ We can do your yearly testing and certification and handle all the required paperwork.
- ✓ We will schedule the testing at your convenience to minimize any interruptions due to service and repair.
